OUR PARTNERS & CERTIFICATIONS

WHO WE ARE

Arana Security was founded in 2013 and is a security solution integrator aimed at improving safety in and around your organization. With our continuous development of state-of-the-art technologies and growing partnerships, we remain up-to-date with products and solutions that provide companies with the highest quality in the security sector. Our goal is to meet the needs of clients and fulfill their requirements by combining know-how, expertise, and technology with excellent quality support and services.

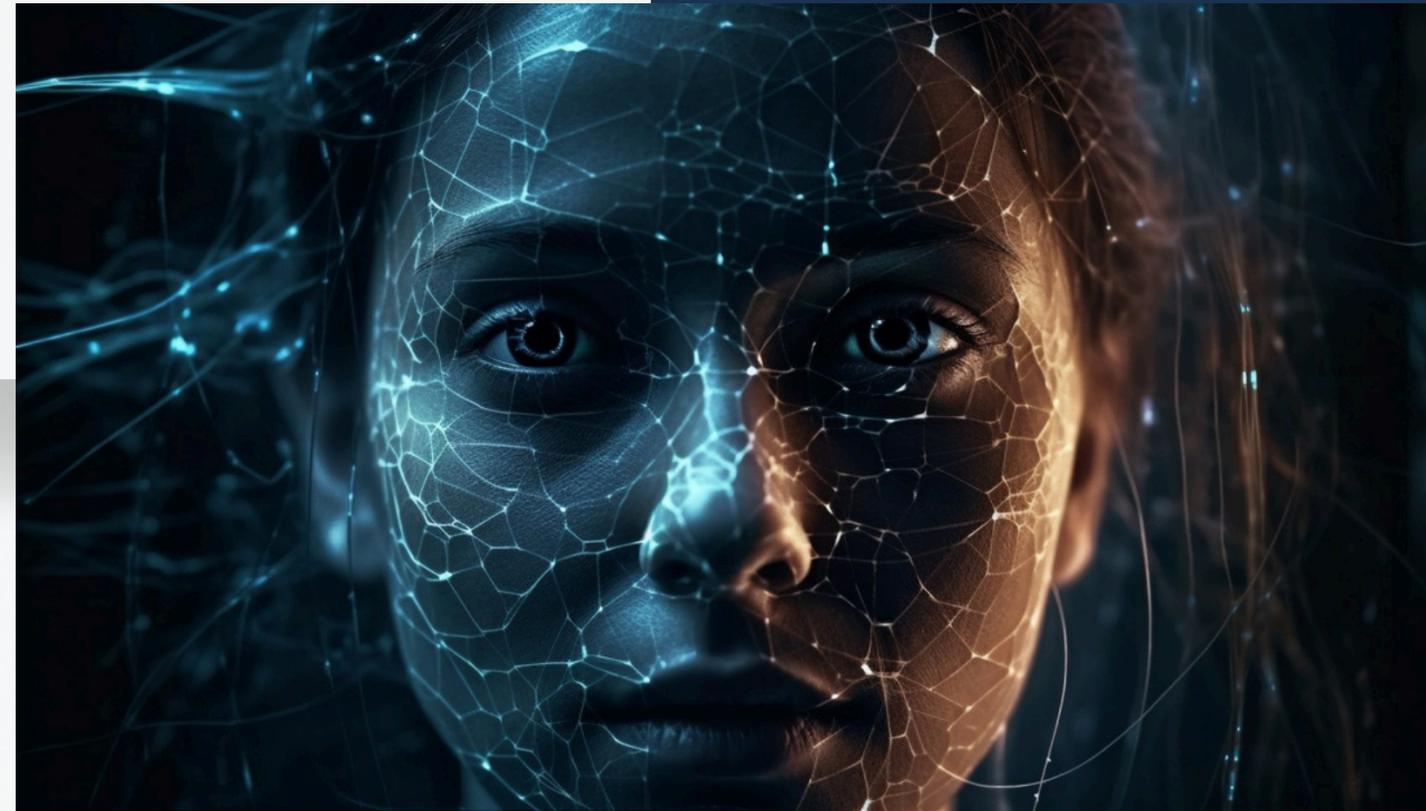

Arana Security specializes in:

- Biometric solution
- Access Control
- Surveillance systems
- App Development

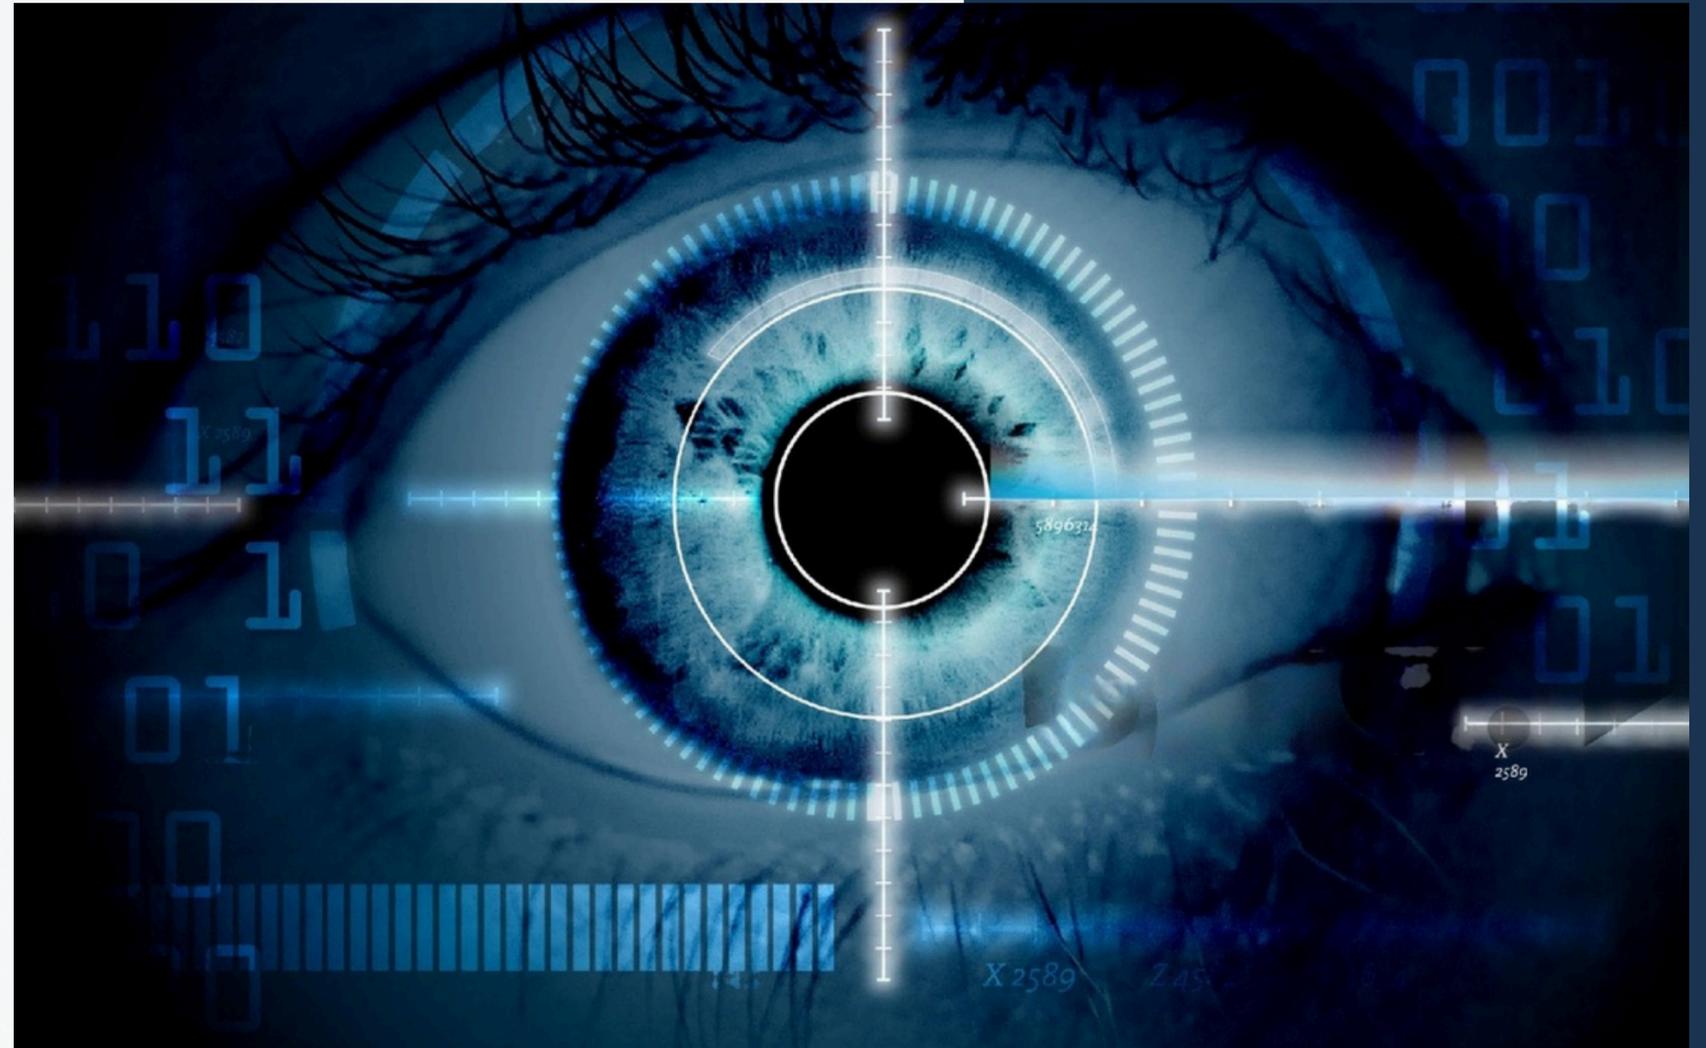

WHY ARANA TIME ATTENDANCE SYSTEM?

- The System Works Online & Offline.
- Supports a wide range of devices from different manufacturers and fingerprint types.
- Effortless creation of attendance and departure rules for employees.
- Streamlined submission of requests through the app (vacation requests, authorizations, remote work requests)

OUR PRODUCTS

BIOWAVE

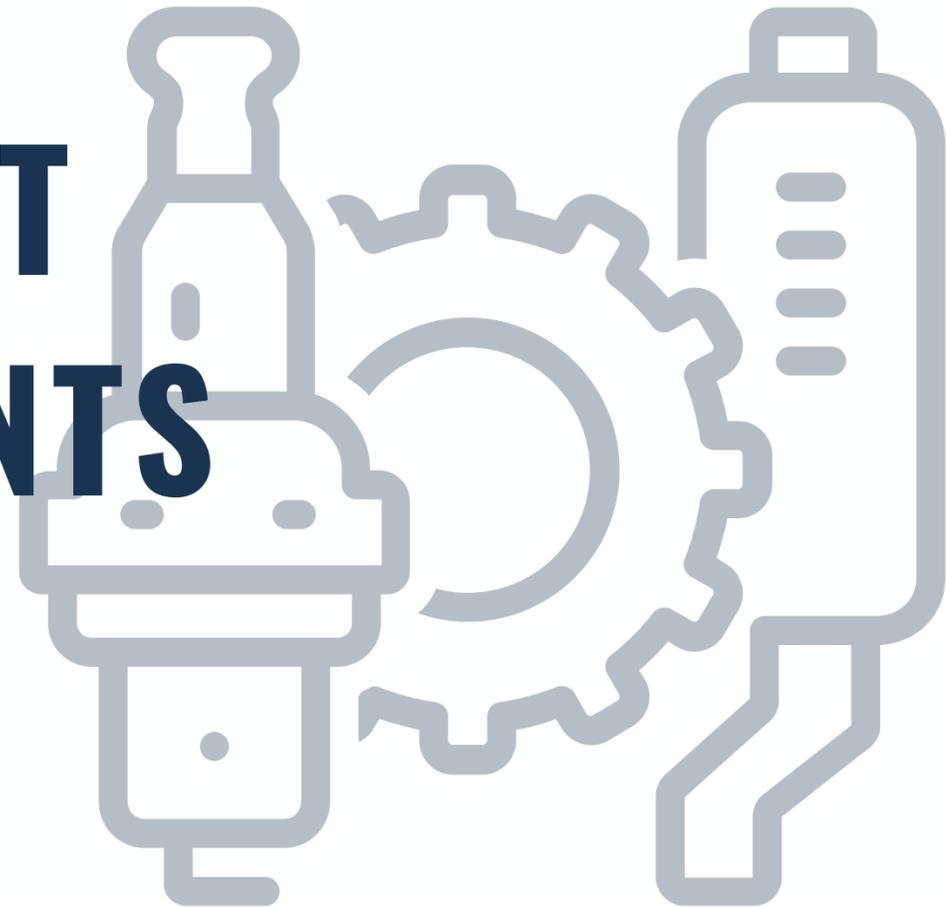

Arana Security is proud to present BioWave, a comprehensive system designed to streamline employee attendance management. This presentation outlines the features and workflow of BioWave, emphasizing its ease of use and efficiency for both administrators and employees.

BioWave integrates:

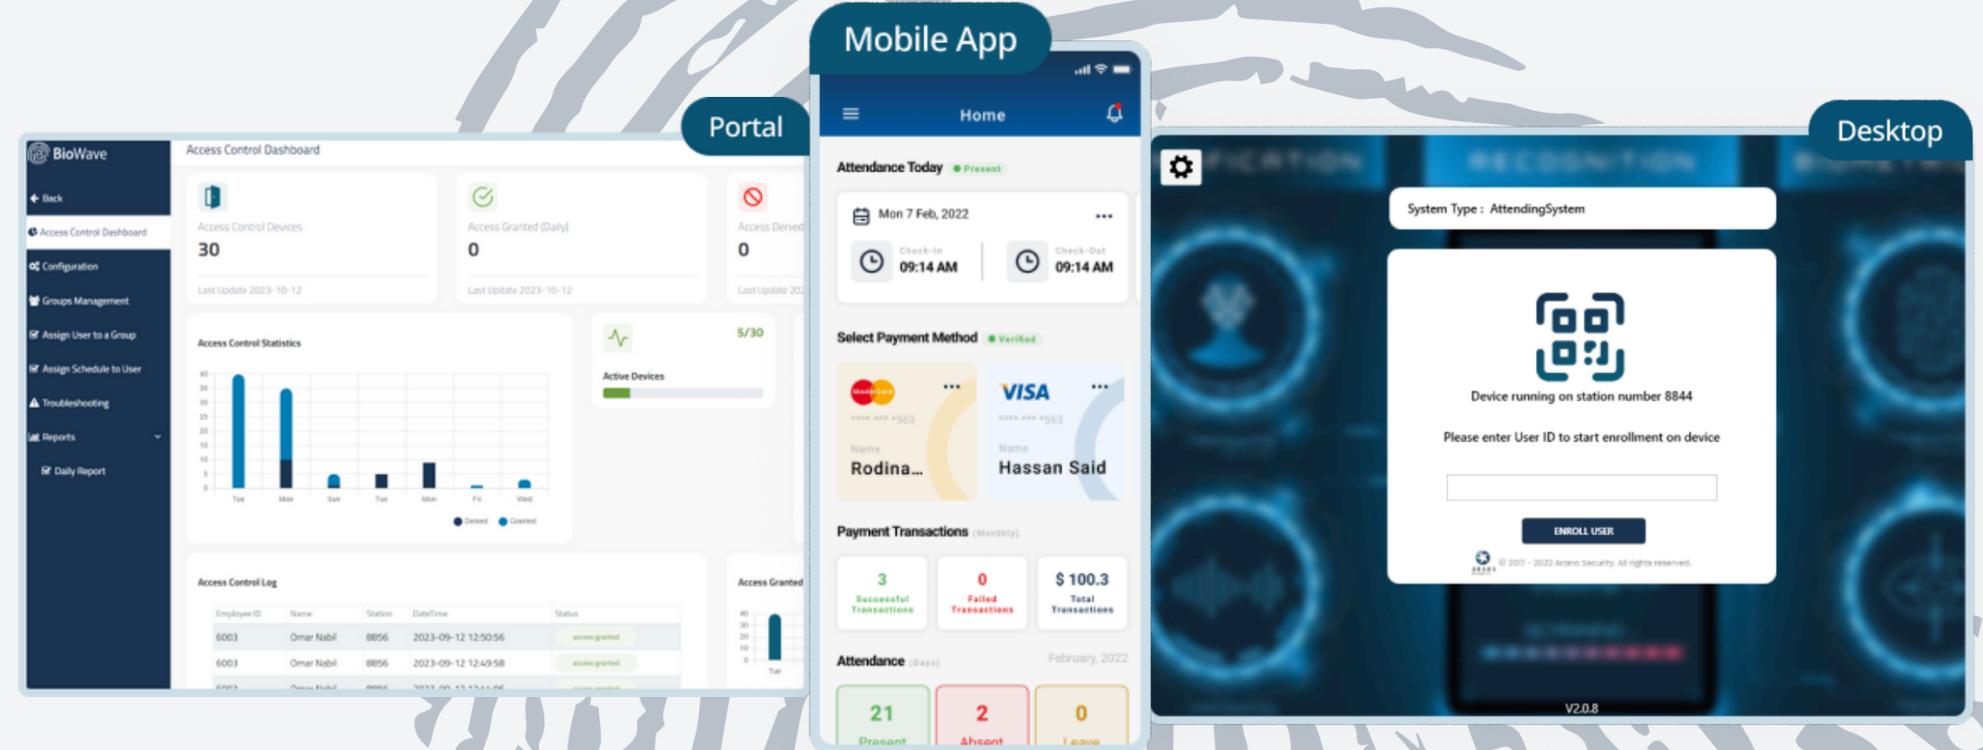

- Web Portal
- Mobile App
- various devices

That Guarantees a complete attendance management solution.

PRODUCT COMPONENTS

- **Web Portal:** Allows admins to oversee and manage attendance data.
- **Mobile App:** Enables employees to interact with the system and access their attendance records.
- **Devices:** Includes options for face recognition, fingerprint scanning, card reading and hand wave identification, and feature buttons for signing in, out, break-in, and break-out.

**BENEFITS
&
SOLUTIONS**

Seamless Integration, Effortless Access

A single platform for all attendance management needs

Boost Multi-Location Authentication strength, Authenticate users onto the system from different locations nationally or even globally.

Admins can generate detailed reports such as daily attendance, absenteeism, and overtime, aiding in accurate record-keeping and decision-making

Ability to add holidays and customize leave types, facilitating better planning and compliance with organizational policies.

The Web Portal is designed for ease of use, making it straightforward for admins to navigate and manage attendance data

Ability to create and assign specific configurations to groups or individual users, offering flexibility to cater to diverse attendance needs.

Easy addition and configuration of various attendance devices (face recognition, fingerprint, etc.) into the system.

Devices handle various attendance actions, reducing complexity

Mobile Application:

The BioWave mobile application complements the BioWave contactless biometric security system, offering a range of benefits that enhance user experience, simplify system management, and provide greater business control.

- **Mobile Management:** View access history, manage personal profiles, and update settings directly from your phone.
- **Increased Convenience:** Enjoy the flexibility of using your phone for secure payments within integrated systems.
- **Real-time Notifications:** Receive instant alerts on your phone regarding access attempts, security updates, or system maintenance.
- **Remote Access Management:** Administrators can add, modify, or delete user profiles and access permissions directly through the mobile app, streamlining user management.
- **Real-time Monitoring:** Gain instant insights into access activity, monitor user movements, and identify potential security concerns, all from your phone.
- **Push Notifications:** Send real-time security alerts and critical updates directly to users' phones, ensuring everyone is informed of important events.

Biowave - ID Screen Tablet

Biowave - ID Screen Tablet

Biowave's integration with the IDEMIA IDScreen tablet revolutionizes attendance tracking. This portable biometric tablet allows you to bring the power of Biowave to any location, capturing accurate biometric data even in remote settings. Whether you're managing a temporary site, a mobile workforce, or an offsite event, the IDScreen tablet ensures seamless attendance tracking with real-time synchronization to your central Biowave system. This means you have reliable data, enhanced security, and the flexibility to adapt to your unique workforce needs.

BENEFITS

Enhanced Flexibility: Expand attendance tracking to any location, adapting to the needs of your workforce.

Heightened Security: Ensure only authorized personnel are granted access, even in temporary settings.

Improved Efficiency: Streamline attendance processes, eliminating manual timekeeping and reducing errors.

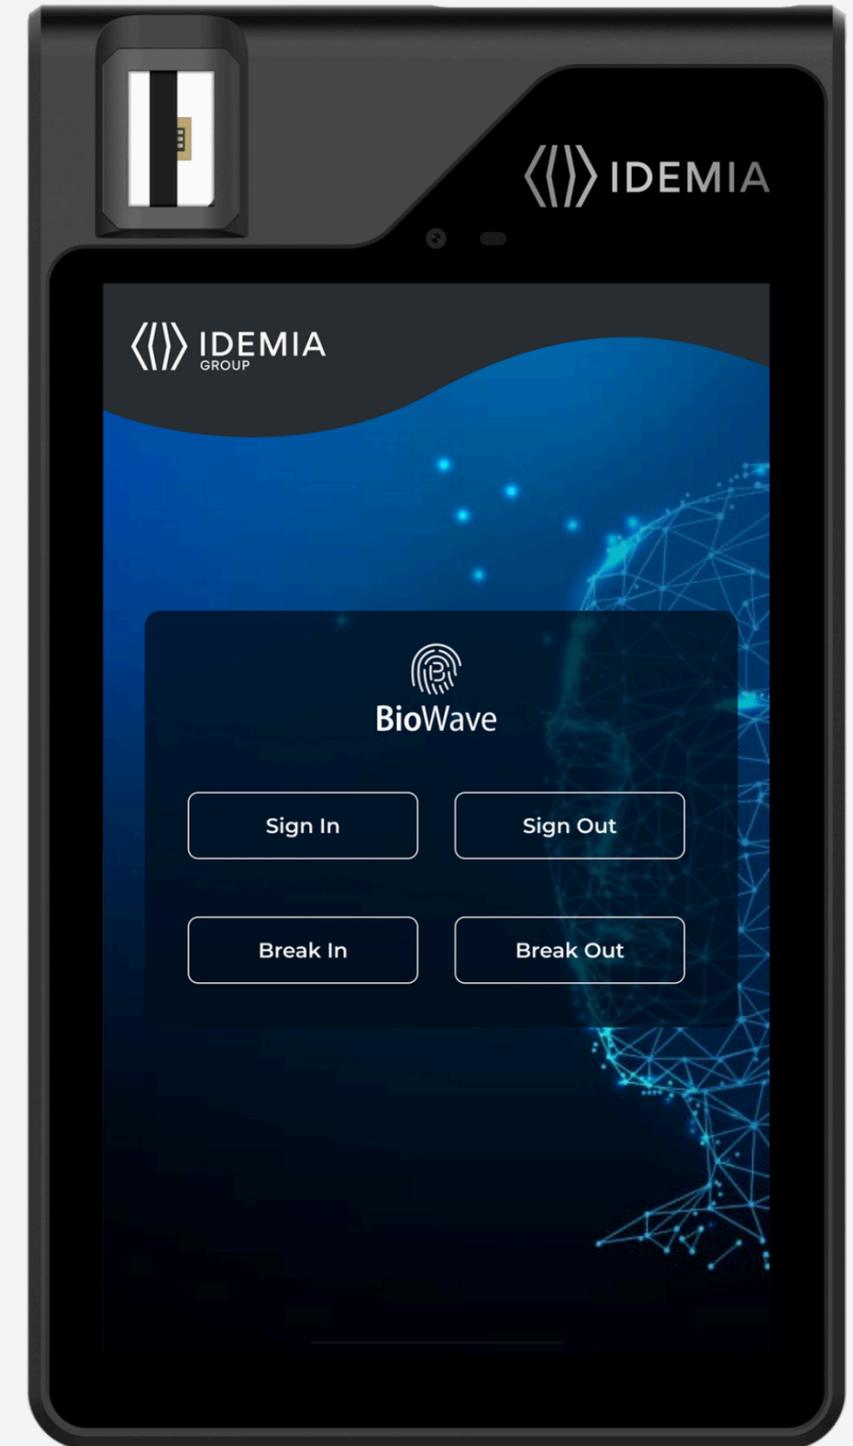

Reliable Data: Rely on accurate, real-time attendance records for payroll, scheduling, and workforce management.

Cost Savings: Reduce the need for additional fixed biometric terminals at remote sites.

Future-Proof Technology: Take advantage of the latest advancements in biometric technology for a secure and adaptable solution.

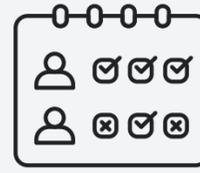

Features

Seamless Biometric Enrollment and Verification: Capture high-quality fingerprints, facial scans, or iris scans directly on the tablet. This ensures accurate identification for attendance tracking.

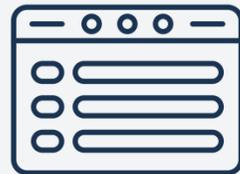

Mobile Attendance Tracking: Extend Biowave attendance capabilities to any location. The tablet's portability makes it ideal for temporary sites, remote workforces, or events.

Offline Functionality: Store biometric data securely on the tablet for offline use in areas with limited or no internet connectivity.

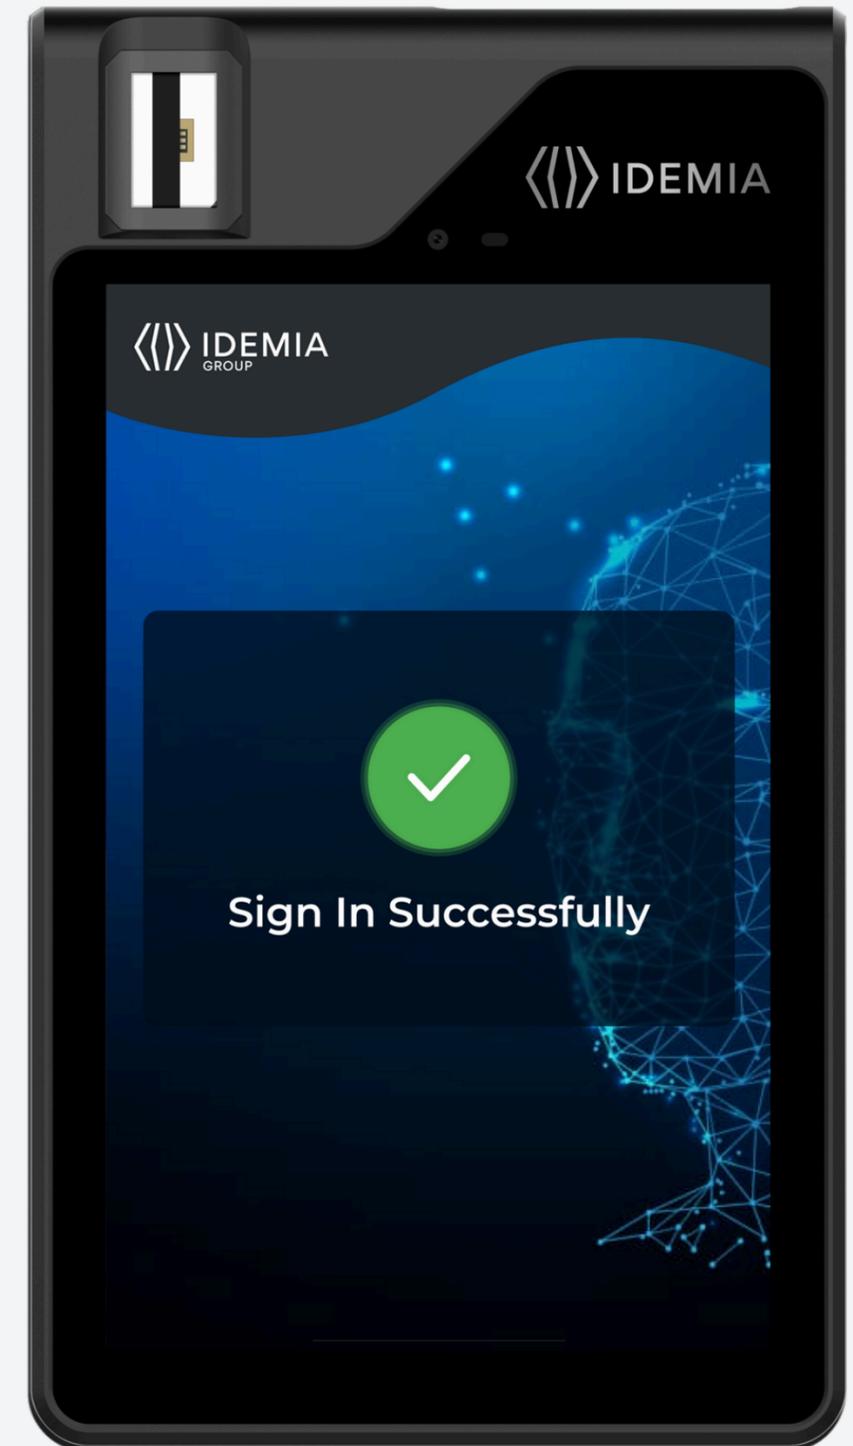

Real-Time Synchronization: When back online, the tablet automatically synchronizes attendance data with the central Biowave system, ensuring accurate records.

Multi-Modal Biometrics: Utilize multiple biometric modalities (e.g., fingerprints and facial recognition) for enhanced security and flexibility.

Device Interoperability: Biometric data captured on the iDScreen tablet is compatible with other IDEMIA biometric devices, creating a unified system.

CASE STUDIES

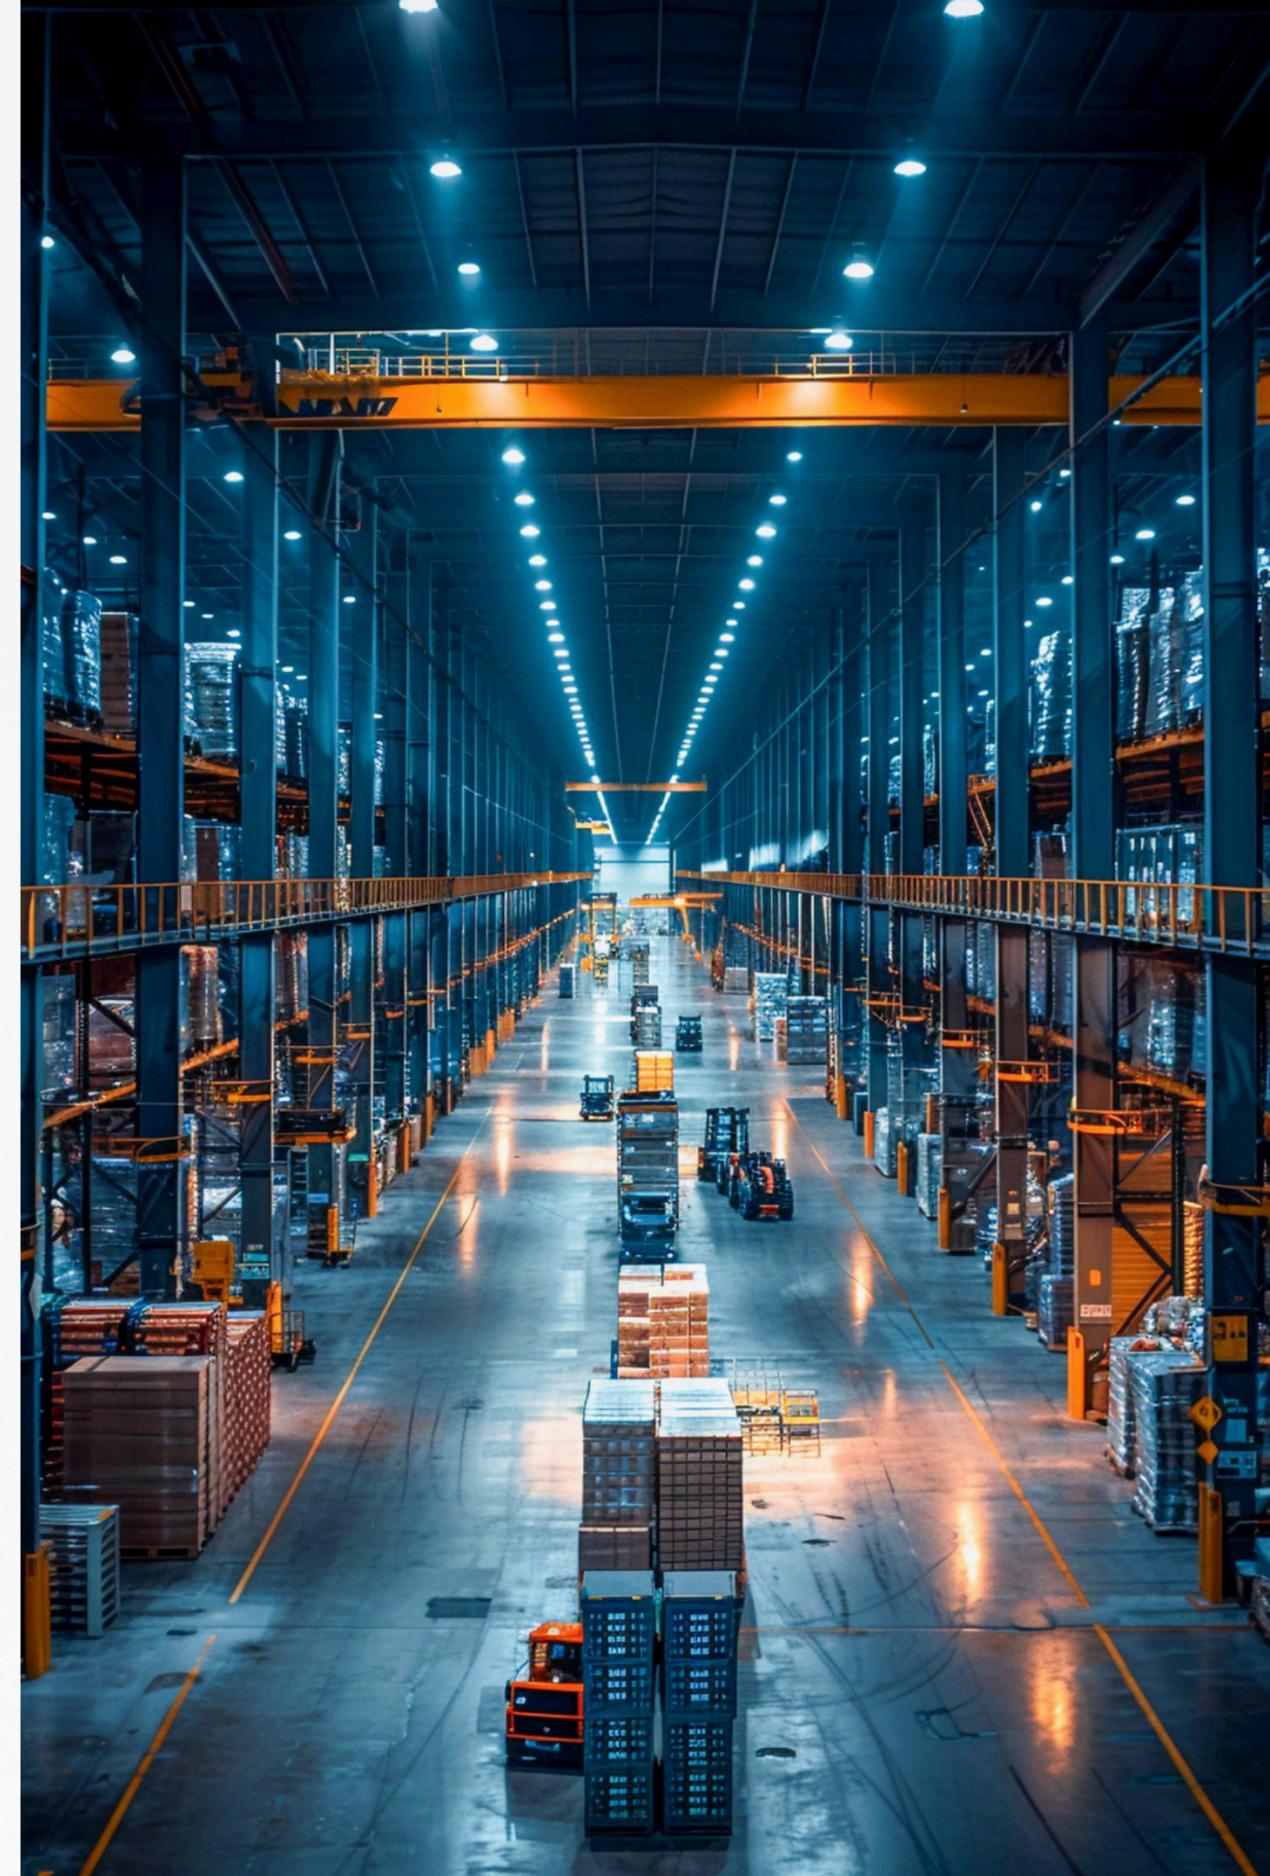

Warehouse Multilocation - Case Study

Know about our work stories on the ground l

Warehouse development in 2020-2021

- 144,000 sq ft warehouse and logistics unit.
- Access was controlled using biometric readers for the staff and contractors were provided with cards.
- The client can manage the level of access and users via a portal.
- 24 biometric access control readers.
- 2x biometric time and attendance (BioWave Attendance).
- In 2021, a new warehouse was built and an additional 14 biometric readers were installed and connected to the same portal as the previous warehouse, allowing the client to manage both warehouse access control from the same portal.
- In addition, a time-attendance module was added to the system.

Our Partners & Certifications

Thanks to our partners' support and collaboration, they help us to enhance and improve Biowave's touchless solution.
